Inputs

Input Control

ILIM Calculation:
R = 2000/(ILIM−0.04)
505R = 2000/(4A−0.04)
Rounded up to 510R

EN pin requires 6V or lower, active high. Battery can fluctuate between 12.6V−9V. Voltage divider used.

Subsystems

Testpoints

Outputs

To signal default power, USB−C source requires putting a 56kR pull−up on the CC lines.
